CS 440 Weekly Progress & Case Tool (Jira) Checklist

Weekly Report:

This is the rubric I am following to grade the Weekly Reports:

❌ ✅

<u>Weekly Progress (Weeklies)</u>

Group Activities

- ☐ All files are loaded where they belong in github, in PDF format, and submitted with meaningful commit messages.
- ☑ The weekly progress report is present, well-named, properly formatted.
- ☑ The weekly progress report header information is complete, and documents an in-person meeting.
- ☑ The weekly progress report documents recent progress for each individual member, if any, or documents no recent progress if a member has not accomplished anything recently.
- ☑ The weekly progress report documents action items for each individual member, indicating what they will be working on in the coming week.

Individual Activities

- ☑ Attended the weekly meeting, or has an acceptable excuse.
- ☑ Came to the meeting on-time and well prepared.
  (Assumed true if present, unless noted otherwise.)
- ☑ Member has documented recent accomplishments.
- ☑ Member has documented action items.
- ☑ Week to week reports show progress is being made.
  (Assumed true if previous 2 boxes checked, unless noted otherwise.)

Things you did well:
I saw that you have filled the backlog with a solid plan. Good job!

Things that could be improved:
About the report:
- Use a pdf file instead of an md file
- There is not much work this week, but from next week on, you might want to include more details about what you have done and what you plan to do.

Here are a few things about the Jira sprints:
- Make sure to assign the issues to each member so that you have something to do in the following week. You can do this by clicking on the issue -> going to “People” -> selecting someone in the “Assignee” field.
- I created a sprint for this week (Sprint 1-1). From next week on, you can follow the same format when you update Jira. The index of the sprints should be 1-N, 2-N, 3-N (N is an element of {1, 2, 3, 4}).

CASE Tool Usage (Jira)

This is the rubric I am following to grade the Jira:

Group Activities

- ☑ Project is set up properly, and contains only coding project content. (No development project)
- ☑ Project backlog contains stories for future development.
- ☐ The current sprint has stories, with effort estimates.
- ☑ Stories are assigned to individual team members.
- ☑ Charts show that progress is being made.

Individual Activities

- ☐ Team member has logged in within the last week.
- ☐ Team member has assigned tasks or stories.
- ☑ Team member has recently completed work.
- ☑ Team member activity stream shows active participation.
- ☑ Team member's task status is evolving through the to-do, in progress, done states.
